

442003BK-LED

Three / Four / Five light pendant

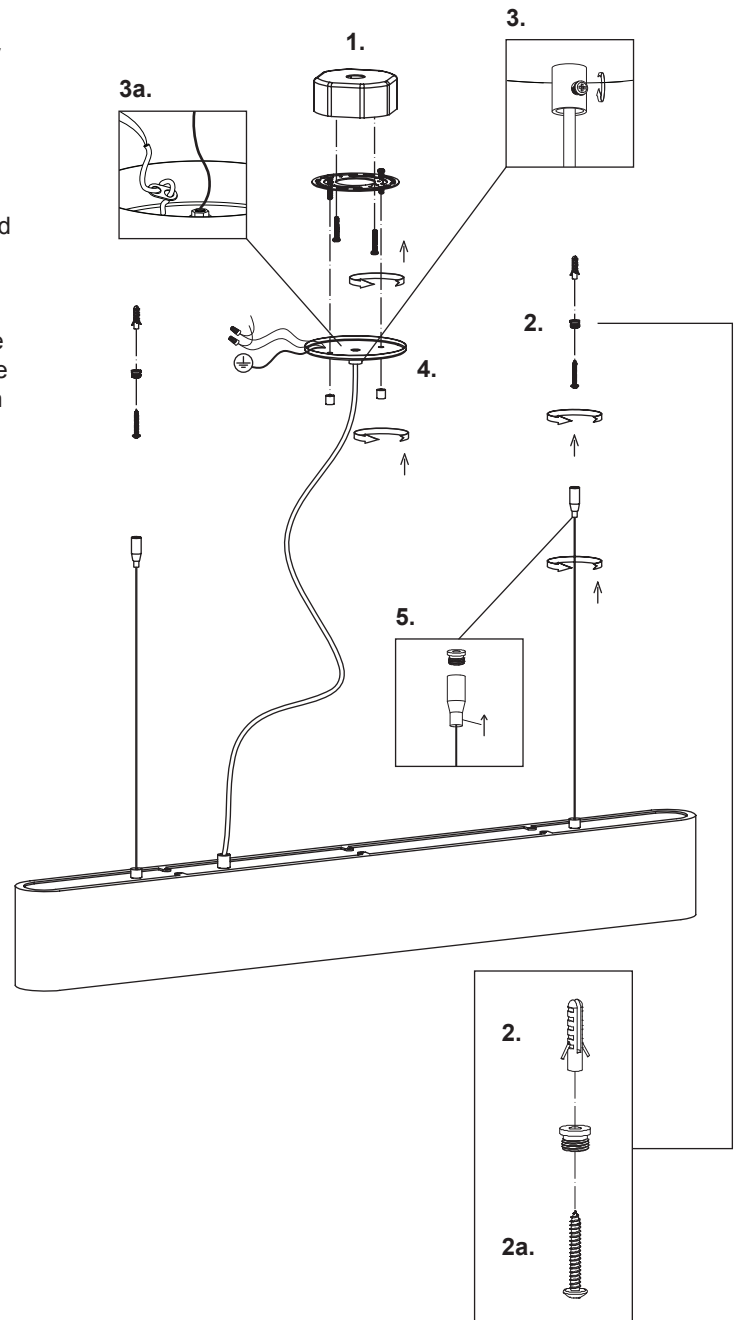

- 1.** Remove the fixture from its original packaging. Remove the canopy mounting plate from within the canopy and attach it to the electrical junction box on the ceiling using the two screws provided in the hardware package.
- 2.** Secure the support cable fasteners to the ceiling using the drywall anchors and screws provided in the hardware package. (2a) Install the drywall anchors in ceiling drywall first, (2b) then secure the support cable fastener to ceiling by screwing the support cable fastener and screw into the drywall anchor mounted in the ceiling (do not over tighten).
- 3.** Select the desired length you would like the fixture cable to hang down from the ceiling. To set the cable length undo the wire strain relief in the center of the canopy until the electrical wire can move freely. When you have achieved the desired cable length tighten the wire strain relief in the center of the canopy.(3a) Slide the wire safety grip down the wire until it is as close as possible to where the wire enters the inside of the canopy to firmly lock the wire in place.
- 4.** Attach the canopy to the mounting plate, which is attached to the electrical junction box on the ceiling. First attach all wiring with the provided marrets (white to white "N", black to black "L", ground to ground "G"). Align the two holes from the canopy to the two screws pointing down from the mounting plate. Push the screws through the canopy plate so they are poking through, once this is complete you can screw on the decorative nuts until tight.
- 5.** Attach the support cables to the support cable fasteners that were mounted to the ceiling in step 2. Using a clockwise screwing motion, attach the support cables to the support cable fasteners (do not over tighten).
- 6.** You have now completed the installation of your fixture, please enjoy.

INSTALLATION SHEET

START FROM HERE

- Make sure power is completely off at the fuse box.
- Have your fixture installed by a qualified licensed electrician
- Prepare everything in clear area.
- Wear gloves at all times during this installation.
- Read instructions carefully before you start assembly.
- Keep this instruction sheet for future reference.
