

Single lamp pendant

- 1.** Remove the fixture from its original packaging. Remove the canopy mounting plate from within the canopy and attach it to the electrical junction box on the ceiling using the two screws provided in the hardware package.
- 2.** Select the desired length you would like the fixture to hang down from the ceiling (72" maximum). To set the fixture hanging height, undo the wire strain relief in the center of the canopy until the wire can move freely. Once the wire has been released, you can push the wire up to shorten, or pull the wire down to lengthen. When you have selected your desired length, tighten the wire strain relief in the center of the canopy and the wire will be held tightly in place, **(2a)** then slide the wire safety grip down the wire closest to the inside of the canopy where the wire enters.
- 3.** Attach the canopy to the mounting plate, which is attached to the electrical junction box on the ceiling. First attach all wiring with the provided marrets (white to white "N", black to black "L", ground to ground "G"). Align the two holes from the canopy to the two screws pointing down from the mounting plate. Push the screws through the canopy plate so they are poking through, once this is complete you can screw on the decorative nuts until tight.
- 4.** Install the glass lens cover onto the fixture by gently placing the cover on to the bottom of the metal LED housing. Carefully screw the cover on to the LED housing in a clockwise motion until the glass lens cover is firmly in place (do not over tighten).
- 5.** Locate the three pins from inside the hardware package. These pins are to hold the fixture glass onto the pendant. Take the pendants metal LED housing and guide it gently through the center of the fixture glass until one of the holes in the glass lines up with one of the holes in the top of the metal LED housing. Insert a pin through the hole in the glass, and screw it into the hole on the side of the metal housing, until it is tight (do not over tighten). Now take the remaining 2 pins and screw them in to the remaining 2 holes on the metal housing until they are tight (do not over tighten).
- 6.** You have now completed the installation of your fixture, please enjoy.

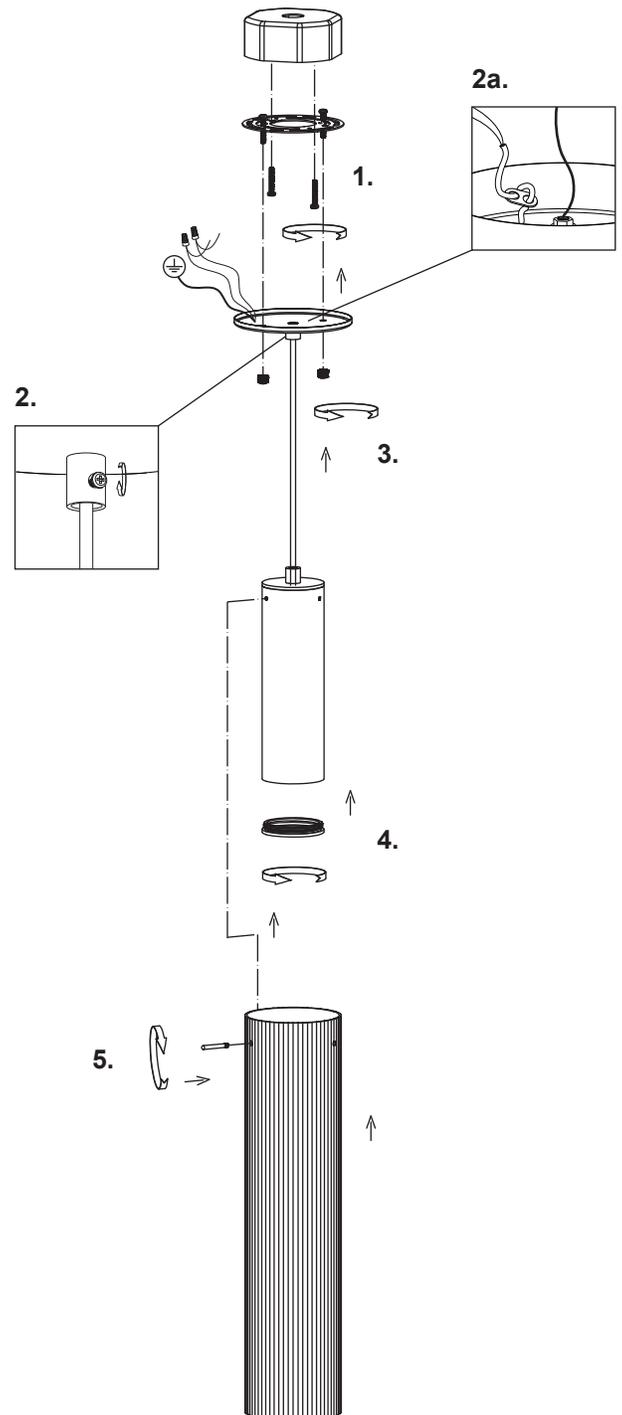

443011CH-LED

INSTALLATION SHEET

START FROM HERE

- Make sure power is completely off at the fuse box.
- Have your fixture installed by a qualified licensed electrician
- Prepare everything in clear area.
- Wear gloves at all times during this installation.
- Read instructions carefully before you start assembly.
- Keep this instruction sheet for future reference.
