

One lamp wall sconce light

640001-LED

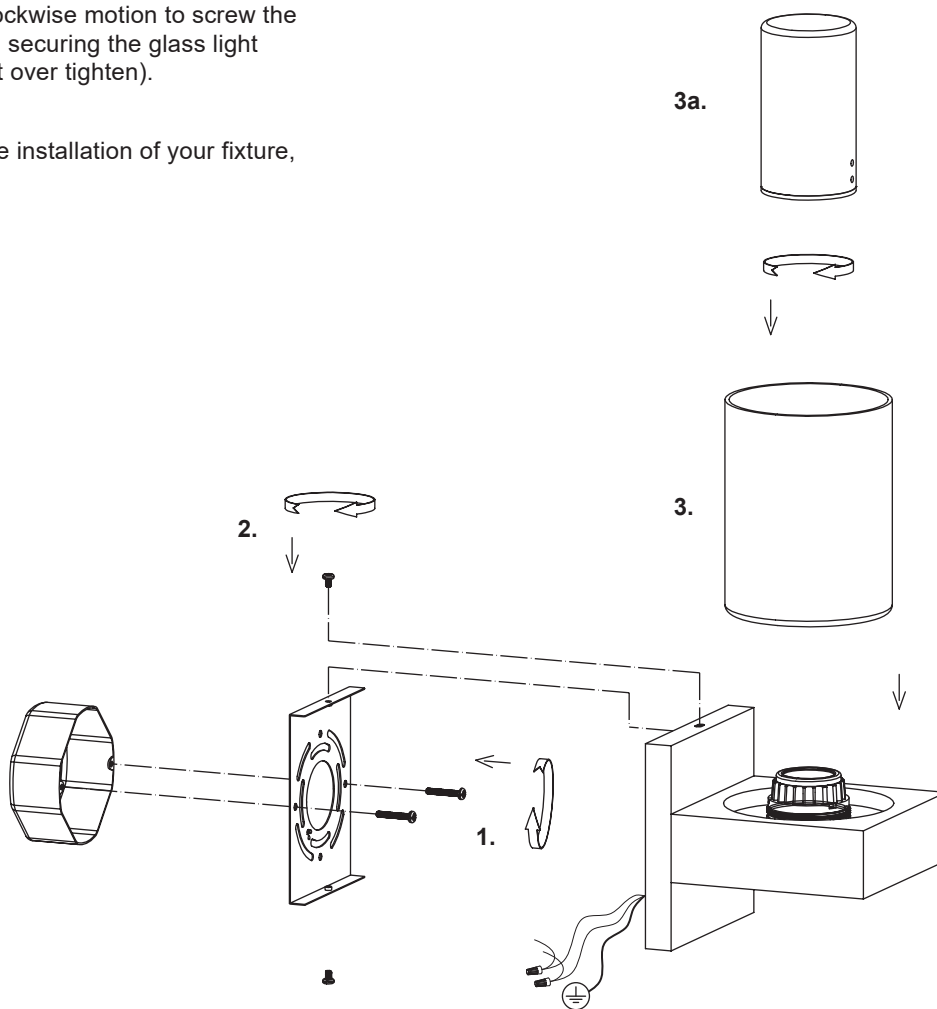

INSTALLATION SHEET

- 1.** Remove the fixture from its original packaging. Remove the canopy mounting plate from within the canopy and attach it to the electrical junction box, and wall, using the two screws provided in the hardware package.
- 2.** Attach the canopy to the mounting plate which is attached to the electrical junction box on the wall. First attach all wiring with the provided marrets (white to white "N", black to black "L", ground to ground "G"). Push the canopy onto the mounting plate and align the two holes (one above & one below) on the canopy to the holes on the mounting plate. Once aligned, screw in the two screws provided to secure the fixture to the wall.
- 3.** Gently place the glass light covers onto the fixture by inserting the LED light into the hole in the bottom of each glass light cover. Place the bigger glass piece onto the fixture first, (**3a**) then take the smaller glass piece and carefully place it into the center of the bigger glass piece, guiding it gently over top of the LED light. Carefully turn the inner glass piece in a clockwise motion to screw the glass piece firmly into place, securing the glass light covers to the canopy (do not over tighten).
- 4.** You have now completed the installation of your fixture, please enjoy.

START FROM HERE

- Make sure power is completely off at the fuse box.
- Have your fixture installed by a qualified licensed electrician
- Prepare everything in clear area.
- Wear gloves at all times during this installation.
- Read instructions carefully before you start assembly.
- Keep this instruction sheet for future reference.
