START FROM HERE

• Make sure **POWER** is **COMPLETELY OFF** at the fuse box
• Have your fixture installed by a qualified licensed electrician
• Prepare everything in a clear area
• Wear gloves at all time during this installation
• Read instructions carefully before you start assembly
• Keep this installation sheet for future reference

Technical Support: 1-855-855-8926

Please Note:
• This Kuzco LED fixture comes with pre-wired LED module(s)
• Unless instructed, Do Not touch any part of the LED module(s) as any unnecessary contact with the module could cause permanent damage
• 12V DC input with Class 2 LED Driver (Driver supplied by others)

1. Remove fixture from its original package

2. Separate backplate **(1c)** from fixture **(2a)** by removing fixture screw **(2b)**

3. Attach backplate **(1c)** to electrical junction box **(1a)** using junction box screws provided **(1e)** in hardware package

4. Make low voltage wire connection by connecting fixture wire to 12V low voltage input wire with wire nuts supplied **(1b)**

5. Align the gasket **(1d)** provided before securing the fixture **(2a)** to the backplate **(1c)**. Attach fixture **(2a)** to backplate **(1c)** and secure with fixture screw **(2b)**

6. To prevent moisture from entering the electrical junction box **(1a)** and causing a short, seal around the top and side perimeter between the fixture and the wall surface with weather resistant caulking **(See Illustration 1)**. The space at the bottom should be left un-caulked to prevent moisture build up.
