# Exterior LED Lamp Wall Sconce

---

START FROM HERE

• Make sure **POWER** is **COMPLETELY OFF** at the fuse box
• Have your fixture installed by a qualified licensed electrician
• Prepare everything in a clear area
• Wear gloves at all time during this installation
• Read instructions carefully before you start assembly
• Keep this installation sheet for future reference

Technical Support: 1-855-855-8926

Please Note:
• All Kuzco LED fixtures come with pre-wired LED module(s).
• Unless instructed to do so, please do not touch any part of the LED module(s) as any unnecessary contact with the module could cause permanent damage.
• For dimming, an ELV (Electronic Low Voltage) type of dimmer is required.
---

1. Remove the fixture from its original packaging. Remove the mounting plate **(3c)** from within the canopy **(4a)** by removing the four set screws **(4c)** and and two nuts **(4b)** attach the mouting plate to the electrical junction box **(3a)**, using the two screws **(3e)** provided in the hardware package.

2. Thread the lead wires from the fixture through the canopy **(4a)** and through the spider plate **(3c)** . Connect all wires correctly G ground to ground, N neutral wire (white to white), L live wire (black to black) with provided marettes **(3b)** from the hardware package. Next, push the canopy **(4a)** towards the mounting plate **(3c)** so the two screws clears through the holes in the canopy **(4a)**. Secure the canopy **(4a)** by using the two nuts **(4b).** With the canopy seated on the mounting plate, secure the fixture **(4d)** with all four set screws **(4c)** turning clockwise.

3. You have now completed the installation of your fixture, enjoy.

Caulking

IMPORTANT: To prevent moisture from entering the outlet box and causing a short, seal around the top and side perimeter between the fixture and the wall surface with weather resistant caulking The space at bottom should be left un-caulked to prevent moisture build-up.
