

LED Semi-Flush Mount

FM12722
INSTALLATION SHEET

START FROM HERE

- Make sure power is completely off at the fuse box.
- Have your fixture installed by a qualified licensed electrician
- Prepare everything in a clear area.
- Wear gloves at all times during this installation.
- Read instructions carefully before you start assembly.
- Keep this instruction sheet for future reference.

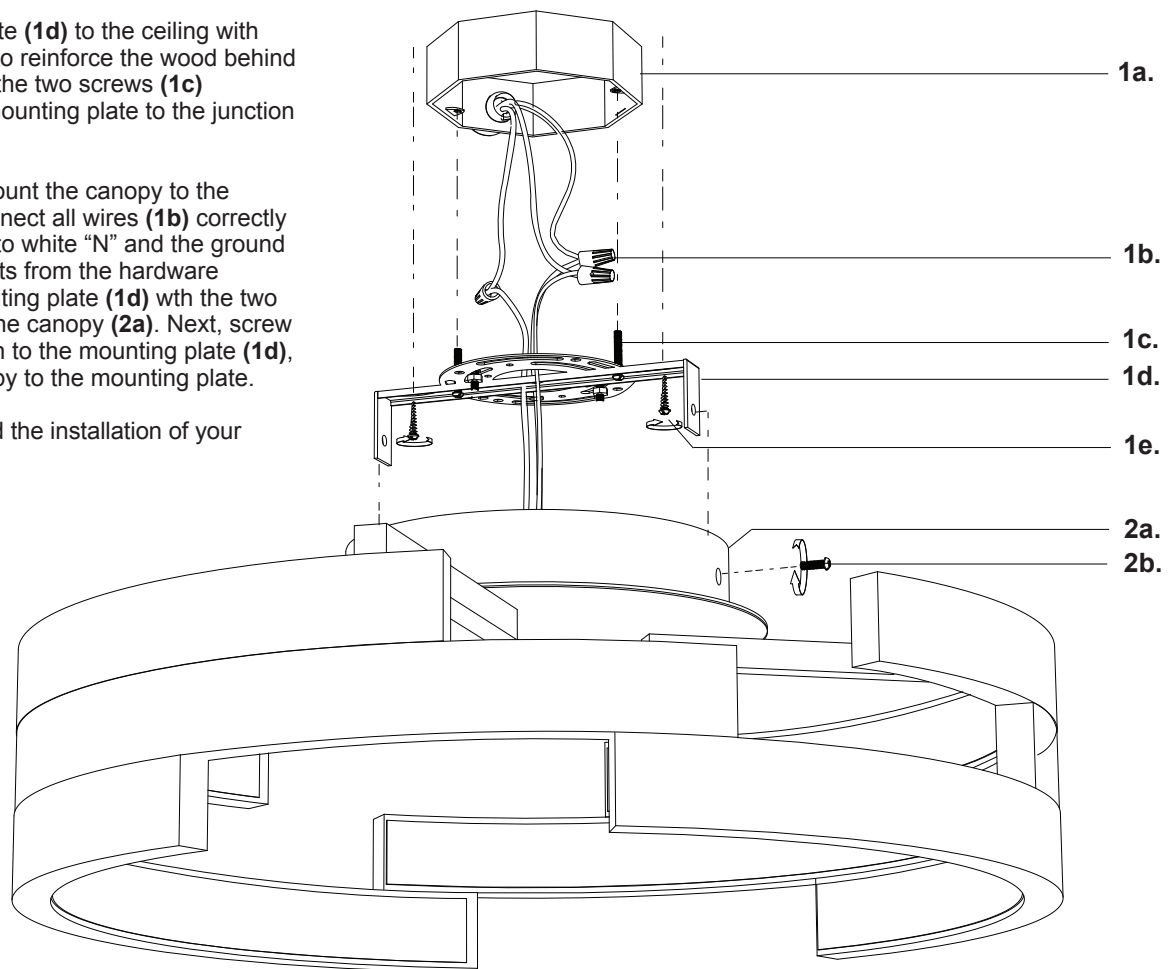

Technical Support: 1-877-452-6858

Please Note:

- All Kuzco LED fixtures come with pre-wired LED module(s).
- Unless instructed to do so, please do not touch any part of the LED module(s) as any unnecessary contact with the module could cause permanent damage.
- For dimming, an ELV (Electronic Low Voltage) type of dimmer is required.

CAUTION: HEAVY FIXTURE, THE JUNCTION BOX NEEDS TO BE REINFORCED BEFORE INSTALLATION.

- 1.** Remove the fixture from its original packaging. Next, remove the canopy mounting plate (**1d**) from within the canopy (**2a**) by un-threading the two screws (**2b**).
- 2.** Secure the mounting plate (**1d**) to the ceiling with screws (**1e**), make sure to reinforce the wood behind the drywall. Now install the two screws (**1c**) provided to secure the mounting plate to the junction box (**1a**).
- 3.** You are now ready to mount the canopy to the mounting plate. First connect all wires (**1b**) correctly black to black "L", white to white "N" and the ground wire with provided marrets from the hardware package. Align the mounting plate (**1d**) with the two holes on the surface of the canopy (**2a**). Next, screw in the two screws (**2b**) on to the mounting plate (**1d**), this will secure the canopy to the mounting plate.
- 4.** You have now completed the installation of your fixture, enjoy.
