

Ceiling LED Pendants

PD51007
INSTALLATION SHEET

START FROM HERE

- Make sure **POWER** is **COMPLETELY OFF** at the fuse box
- Have your fixture installed by a qualified licensed electrician
- Prepare everything in a clear area
- Wear gloves at all time during this installation
- Read instructions carefully before you start assembly
- Keep this installation sheet for future reference

Technical Support: 1-855-855-8926

Please Note:

- All Kuzco LED fixtures come with pre-wired LED module(s).
- Unless instructed to do so, please do not touch any part of the LED module(s) as any unnecessary contact with the module could cause permanent damage.
- For dimming, an ELV (Electronic Low Voltage) type of dimmer is required.

- 1.** Remove the fixture from its original packaging. Remove the canopy mounting plate (**1c**) from within the canopy (**2a**) by removing the decorative nuts (**2c**). Secure the mount plate (with canopy screws facing downward) to the reinforced junction box (**1a**) using screws (**1f**) provided in the hardware package.
- 2.** Before you mount the canopy (**2a**) to the mounting plate (**1c**) please select the desired length you wish the pendant to hang. To shorten or to lengthen the wire push up the tiny nipple (**2b**) and where the wire comes through the canopy (**2a**) push or pull the wire to your desired length then release the nipple and the wire will stay in place.
- 3.** You are now ready to mount the canopy (**2a**) to the mounting plate (**1c**). First connect all wires (**1b**) correctly, black to black "L", white to white "N" and the ground to ground with the provided marrets from the hardware package. Align the threaded screws (**1d**) hanging downward from the mounting plate to the holes inside the canopy (**2a**). Push the canopy up towards the ceiling so the two screws (**1d**) point through the holes in the canopy. You can then screw on the decorative nuts (**2c**) onto the threaded studs (**1d**) pointing through the canopy (**2a**). This will secure the canopy to the mounting plate.
- 4.** LED Engines are built in. Push the glasses (**3a**) up to the LED engines (**3b**) and thread turning clockwise.
- 5.** You have now completed the installation of your fixture, enjoy.
