

Single lamp vanity with white squared acrylic

VL3224 INSTALLATION SHEET

Please Note:

- All Kuzco LED fixtures come with pre-wired LED module(s).
- Unless instructed to do so, please do not touch any part of the LED module(s) as any unnecessary contact with the module could cause permanent damage.
- For dimming, an ELV (Electronic Low Voltage) dimmer is required.

START FROM HERE

- Make sure power is completely off at the fuse box.
- Have your fixture installed by a qualified licensed electrician
- Prepare everything in clear area.
- Wear gloves at all times during this installation.
- Read instructions carefully before you start assembly.
- Keep this instruction sheet for future reference.

Technical Support: 1-877-452-6858

1. Remove the fixture from its original packaging and remove the fixture mounting plate from within the hardware package. Attach the fixture mounting plate to the electrical junction box (1a) on the wall using the two screws provided in the hardware package.

2. Attach the fixture (2a) to the mounting plate (2b), which is attached to the electrical junction box on the wall. First attach all wiring with the provided marrets (2c) (white to white "N", black to black "L", ground to ground "G"). Push the screws (2d) from the mounting plate through the holes in the back of the fixture so they are poking through into the center of the fixture (2a). Once this is complete you can screw on the decorative nuts (2e) until the fixture (2a) is secured to the wall.

3. Install the glass (3a) and acrylic diffuser cover (3b) onto the fixture. The acrylic cover is installed by gently pushing the two forward between the two end plates. When the acrylic meets the fixture increase pressure until the acrylic catches the fixtures top and bottom leading edges by the bracket. Lastly, connect the decorative and plates (3b) to the fixture using the machine screws provided.

4. You have now completed the installation of your fixture, enjoy.
