Cerno Group

The adaptive and interactive features of the Talea introduced exciting challenges to the Cerno team. The fixture thrives in a range of spaces and applications and is a beautiful mixture of utility and elegance. It makes use of an expressive hinge, suggesting an ability to swing, while the wood to metal arm suggests an arm that can telescope. [www.cernogroup.com](http://www.cernogroup.com)

6. Cantina  
Sonneman - A Way of Light

A flask-like flat oval glass profile rotates randomly creating an asymmetric relationship to its surroundings.
