

Lighting & Accent DECOR DISCOVERIES

It's the difference between warm brilliance and jarring sharpness and a stylistic accent within your space. Lighting fixtures not only illuminate, but they're also that key missing piece to your home's interior design. Selecting the right one, then, completes its overall balance. ■

Kuzco Lighting Flush Mount

One light fixture gives you multiple presentations – it all just depends on the angle at which you glance up at it. Layers and cutouts, all spaced at different intervals around a banded circular design, create these varying perspectives from the sides and below, making a statement that's distinctive yet not especially obtrusive.

Serena & Lily Vineyard Side Table

By this side table's branch-like details and intertwining design, you'd be forgiven if you thought you were staring into a thicket of petrified wood. Rather, based on the French faux bois style, reconstituted stone takes on such a grain-like effect, adding more substance and possibilities in the process. Arrange a pair as end tables, or in taking advantage of its sturdier construction, use it as a base for a larger figurine, lamp, or indoor plant.

Melange Devera Console Table

Should a table reflect the space, or the space reflect the table? This piece manages to do both. Wooden framework with an antique finish blends into rustic-leaning rooms, while metallic-painted glass tiles simultaneously act as a mirror displaying the surroundings. While the two-way concept ultimately becomes a statement, its construction gives you a place to house odds and ends with its interior shelves and highlight artwork along the top.

Control Brands Pelikansgrand Ceiling Lamp

For illuminating a room, lighting ideally is a centerpiece that doesn't draw too much attention. While these points appear to contradict each other, the Pelikansgrand embodies a bit of each. A thin, matte steel body, undulating yet angular, appears almost like a flowering vine with semi-transparent glass shades at the ends. Yet, its size occupies less space than your average floor lamp, and as such, its warm, somewhat quirky presence never comes off as sharp and forced.

Hooker Furniture Chatelet Scroll Accent Table

Even small things turn into a grand gesture. This accent table's scrolling, while short at a glance, has Grecian column-worthy details, adding an air of stateliness to your living space. Yet, it's not all pomp and formalities. Instead, paint rubbed away to produce an aged, rustic character infuses it with particular blast-from-the-past charm.
