**TARGETTI**

OZ is a new, user-friendly, 48V modular system that provides designers with a versatile, modern, and compact lighting system that is easy to install and offers multiple configurations through a system of special connections and different profiles. The customizable OZ system features a choice of MICRO and MINI LED light modules that magnetically mount to a dedicated power rail that offers a choice of recessed, surface, and suspension-mount installation options. **KUZCO**

The Flux task lamp has a Minimalist silhouette and a cast aluminum shade with a recessed, partially frosted glass diffuser to provide an ambient wash of LED light where directed. It has an illuminated ring as a finder light and a touch-activated dimmer. Magnetic connectors allow for an unrestricted range of rotation. [www.kuzcolighting.com](http://www.kuzcolighting.com)

**HEALTHÈ BY LIGHTING SCIENCE**

The SunTrac Daylight & Motion Sensor turns energy code requirements into interior enhancements, with soft ons, offs, and imperceptible intensity changes. Self-powered and wireless, it detects motion and daylight levels to provide appropriate lighting for the given space. Thresholds for ambient light levels and timing for motion sensor responses can be easily customized using the SunTrac app. Gradual power ups and downs, along with smooth intensity transitions, create a welcoming and uniquely comfortable visual experience, avoiding distracting, abrupt changes in light output. # BRIGHT FUTURE FOR PORTABLE LANTERNS

DELTA // KUZCO LIGHTING

#### FEATURES

- \* Touch dimming LED
- \* Rechargeable lithium-ion battery with 9-hour run time

The growth of outdoor living spaces for residences and al fresco seating for restaurants has been a boon to the world of battery-powered, decorative accent lighting.

BY DAVID SHILLER

category that harkens back to the days of oil lamps and candles has been reborn thanks to advanced rechargeable batteries, solar power, LEDs, and a range of consumer electronic features.

Portable lanterns may conjure up images of camping or developing nations without electricity, but think again. This category has gone highly decorative, extremely functional, and even high-end. Believe it or not, there are highly decorative portable lanterns selling online for \$600 each.
