KUZCO

WESTINGHOUSE

The Retro-style shape and filament design provide a nostalgic look for this high-performance ST20 LED. It produces the same light output as a 60-watt incandescent, but uses only 6.5 watts of energy. This bulb features a warm 2700K color temperature, creating ambient, soft white light. www.westinghouselighting.com

LITE SOURCE

The Quilla Collection features Modern Minimalist design with choices of sophisticated frosted glass or elegant diamond glass shades, as shown here. The LED inside provides a bright, yet eco-friendly, light source; the table lamp offers dual USB charging ports. www.lite-source.com

MAXIM

Soft Gold and Black finishes combine in Flare for a trendy presentation. Three rings suspend three tubes of LED light that is evenly diffused through opal white acrylic. By adjusting the rings on the chandeliers, the light element can be positioned horizontally or at an angle. The height of each ring can also be adjusted. www.maximlighting.com

KUZCO

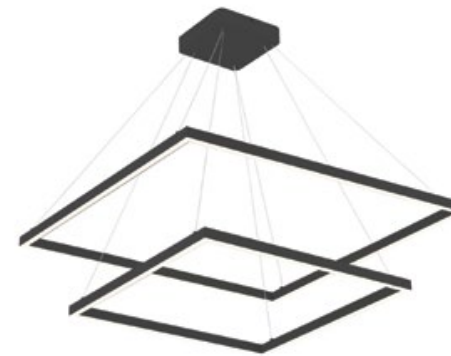

In Piazza, a suspended rectilinear frame emits soft illumination downward from the continuous-perimeter opal diffuser. Veiled within the aluminum extrusion is a secondary set of LED lights that send ambient illumination up toward the ceiling. It is also available as a singular pendant. www.kuzcolighting.com

SATCO

A new family of low-profile linear recessed direct wire downlights comes in five lengths from 12" to 48" and allows for contemporary design through installation patterning. The downlights offer a color-selectable switch, allowing the user to adjust the color temperature to 3000K, 4000K, or 5000K during installation as per their preference. www.satco.com

HINKLEY

In the Facet LED vanity, interesting angles combine with a bold center bracelet to create a Contemporary look. Hexagonal etched glass is showcased by a Heritage Brass center and end caps of the same shape, while the Invisi-mount system remains unseen to highlight the superior style. The fixture uses one 32-watt LED and delivers 2,400 lumens. www.hinkleylighting.com

The small size of LEDs allow for ultra-slim fixture designs & energy savings that were never possible before.

KICHLER

Inspired by antique door hardware, the Arabella Collection features clear optic crystal and a sparkling Polished Nickel finish. In this sconce, two LEDs deliver 675 lumens. The style is also available in chandelier variations. www.kichler.com

LZF

The 26"-high Lens table lamp, designed by MUT design studio for LZF, is composed of a single opaque LED lens set into a metallic base and encircled by two concentric ellipses. The wood veneer acts as a diffuser. www.lzf-lamps.com

PROGRESS

With a nod to its farmhouse roots, the Briarwood three-light bath offers triad clear glass shades attached to a Graphite-finished backplate. The X-brace design takes center stage atop a white-washed, faux wood backplate, giving the fixture a rustic feel. It is lamped with three LED bulbs (sold separately). www.progresslighting.com
