AMERLUX

Slots and Dots is an easily configurable track light system that creates visual ambiance for hospitality and retail environments. Clean, compact styling ensures it looks good in any environment. Measuring just 1-inch wide, the track features magnetic attachments so light sources can be easily snapped in and out as needed, ideal for changing the lighting in a room between events.

Available attachments include accent track heads in 2 sizes, 1 pendant accent, and 4 linear options, including lensed sources for ambient light and high-performance optics for direct light. The track comes in 2-, 4-, and 12-foot lengths that join together for clean lines of light.

KUZCO

The asymmetrical flowing design of the Fleur LED chandelier allows for a unique adjustment; the fixture may remain planar or expand upward to resemble a helix. It can be ordered in 3 sizes.

MODERN FORMS

The sculptural Chronos chandelier is suspended by adjustable ultra-thin aircraft cables for a clean look. It is ETL-listed for damp locations and ideal for architectural, hospitality, and commercial environments with tall ceilings and large spaces. The fixture is made of aluminum hand-finished in Aged Brass and paired with white, sanded acrylic diffusers that conceal the LED light source, which operates via a universal 120V-277V driver and dims with an ELV, TRIAC, or 0-10V dimmer.

The 75-watt model – which measures 50 inches wide and has a cable length of up to 130 inches – delivers up to 2,696 lumens. The 48-watt version measures 34 inches and has a cable length of up to 99 inches. Both chandeliers deliver 3000K illumination in 90 CRI and have 50,000 hours of rated life.
